

STEM Club

STEM Club is a place to use Science, Technology, Engineering, and Mathematics to help solve either personal or real world problems. The solution to these problems could require a model or be a computer program. If you choose a problem you will need to complete a solution before moving on to something else. You can work by yourself or work with a team... it's all up to you!

It is important that both club members and parents understand that students will not have access to the larger machines in the classroom. This is due to the safety of both yourself and others in the classroom. However, you will have access to smaller handheld power tools like a drill.

Instead of building with tools you could also program a solution using the computers. The key concept is that STEM Club is your time to solve what problems you want to solve. In addition to what ideas you think about, websites will be provided for inspiration. If you are more motivated and think your idea could be great, find a competition between other schools and see how it measures up!

Please fill in the information below and have your parent or guardian sign in the space provided. The late busses will be available to those who are eligible for the bus on Monday and Thursday each week. If you are not eligible for the bus you will need to make arrangements to get home.

Name: _____

Grade: _____

Transportation (circle one): BUS WALK PARENT PICK-UP

Preferred Day (circle one): Monday Thursday Doesn't Matter

Attendance is mandatory due to the number of students who will be interested in the club. Excused absences include days where you are out sick or an absence note is submitted by a parent through e-mail or on a sheet of paper before the next STEM Club meeting. Students will only be allowed to come on the one day they were assigned. Coming on the wrong day will be counted as an absence. Rosters will be posted outside Room 112 with the assigned day and on the Schoology webpage for STEM Club.

Student Signature: _____

Parent Signature: _____
